EDUCATION

University of Pittsburgh, Pittsburgh, PA *Expected May 2027*
Candidate for B.S. in Computer Science and B.S. in Economics GPA: 3.8
Coursework: Algorithms and Data Structures, Systems Software, Machine Learning, Software Quality Assurance
Extracurriculars: Ski and Snowboard Club (VP), Pitt Powersports (Treasurer), German Club

WORK EXPERIENCE

SAP – Software Engineer Intern *May 2024 – Present*

Application AI (Palo Alto, CA) *May 2026 – Present*

- Architecting and shipping full-stack features for Experience Generation, SAP's LangChain-based platform supporting Forward Deployed Engineering (FDE) engagements with enterprise customers.
- Spearheading greenfield development of a shared "Projects" workspace feature, enabling customer teams to collaborate on artifacts across the platform. Full-stack implementation including permission-aware agents.
- Built automated code review tooling as a Claude Code skill atop the pr-review-toolkit, used by 20+ engineers.

Experience Engineering (San Ramon, CA) *May 2025 – Apr 2026*

- Developed and shipped native iOS features across 15+ enterprise apps for SAP's 112,000 global employees, using Swift, SwiftUI/UIKit, and the SAP Fiori iOS SDK.
- Wrote XCTest unit tests and XCUITest UI automation for CI, adding regression coverage for bug fixes.
- Owned bug investigations end-to-end, working with reporters to reproduce, root-cause, and fix issues.

CoE Analytics (Newtown Square, PA) *May 2024 – Apr 2025*

- Built and shipped a full-stack internal BTP tool automating key "expensive statement" data-processing steps, generating reports and slide decks for performance investigations, replacing a manual CSV analysis workflow.
- Cut per-case turnaround from ~1 hour to minutes for 100+ support engineers investigating cases for SAP's largest enterprise customers; now maintained by the team.

Narberth Community Food Bank – Community Volunteer *2022 – 2024*

- Prepared bags of produce, refrigerated goods, and nonperishable goods for guests. Trained other volunteers.

PROJECTS

Simple Canvas Tasks: Privacy-first Chrome extension that replaces Canvas's sidebar with a tabbed to-do widget and live due-date countdowns. Live on the Chrome Web Store with 200+ weekly active users; iterated based on user feedback.

Cleanup Crew: Top-down action game in Rust/Bevy, featuring custom ECS architecture, physics, and procedural generation. Built with an 8-person team in weekly sprints for CS 1666. Published on Steam with 1,500+ demo downloads.

Trust Circle: Group savings platform where friends contribute toward shared financial goals. Built with React, Flask, SAP HANA Cloud, and SAP AI Core with OpenAI models. Winning project at SAP STAR Hacks 2025.

Steam Game Recommender: Collaborative-filtering recommendation engine using SGD and ALS matrix factorization on implicit feedback (Python, pandas, NumPy). ALS with k=200 latent factors achieved a 264% lift in hit rate@10 over a popularity baseline at 99.36% sparsity.

EXTRACURRICULARS

Vice President of the Pitt Ski and Snowboard Club *Sep 2023 – Present*

- Organizing and managing 6 ski trips annually for 750+ students, overseeing a $30K annual budget and logistics.

SKILLS

Languages: Python, Swift, TypeScript, JavaScript, SQL, C, Rust, Java, GraphQL, Bash, HTML/CSS; German
Libraries and Frameworks: LangChain, React, SwiftUI, UIKit, Node.js, Flask, PostgreSQL, pandas, NumPy
Testing and Tools: XCTest, XCUITest, pytest, Selenium, Xcode, Git, Docker, Jenkins, Claude Code, Cursor, OpenAI Codex
